Alberta Utilities Commission  
Fifth Avenue Place, #400, 425 – 1 Street SW  
Calgary, AB T2P 3L8

Dear Mr. Lowther:

**RE: Consultation on process and procedure for objections to reliability standards**

Capital Power Corporation (“CPC”) thanks the Alberta Utilities Commission (the “Commission”) for the opportunity to provide comments on the process and procedure for objections to reliability standards. We support the proposed stakeholder consultation process proposed in Bulletin 2011-02. We believe that aligning the process for objections to reliability standards with the process for objections to ISO rules will aid transparency and consistency in the rulemaking process. CPC appreciates the extra time this process allows for the issuing of notices and the filing of objections. We believe that objections to reliability standards may require more time to prepare evidence due to the highly technical and complicated content of reliability standards as such we support the additional flexibility that the proposed process allows.

All communications with respect to this consultation should be addressed to:

Capital Power Corporation  
5<sup>th</sup> Floor, 505-2<sup>nd</sup> Street SW  
Calgary, Alberta T2P 1N8

Attention: Jim Morison
