Subject: ENMAX response to AUC Bulletin 2011-16 Stakeholder consultation regarding process and procedure for reliability standards

Hi Darin,

ENMAX appreciates the opportunity to provide comments on the stakeholder consultation process regarding Alberta Reliability Standards ("ARS"). Our company has actively participated for years in the working groups and stakeholder sessions held by the AESO with regards to ARS.

We support the proposed stakeholder consultation process outlined in AUC Bulletin 2011-02 (Errata) dated January 20, 2011. We agree with Professor *Emeritus* David Mullan's findings in AUC Bulletin 2011-16 dated June 30, 2011.

Transparency and a process not encumbered with exclusions will only benefit the Alberta Interconnected Electric System.

Warm Regards,

Penny
