Re: Consultation on specified penalties for Alberta Electric System Operator expedited Core Market ISO Rules –Expedited changes to AUC Rule 019

Dear Darin,

In response to the Alberta Utilities Commission's request for feedback regarding the amendments to AUC Rule 019 dated December 21, 2012, ENMAX Energy Corporation ("EEC") does not oppose the changes as proposed by the MSA in AUC Bulletin 2012-20.

In addition, EEC has no objection to the request to expedite these changes to maintain consistency and continuity in relation to the MSA's enforcement activities.

Should you have any questions, please do not hesitate to contact the undersigned. EEC appreciates the opportunity to participate in this process. Thank you.

Yours truly,
