**Re: ATCO Pipelines
Radiographic Weld Inspection**

Q3 2017 Quarterly Update: 2017-2018 General Rate Application (Proceeding ID 22011)

Please find the attached quarterly update for Q3 of 2017 of 'Spreadsheet (b)', with regards to ATCO's radiographic weld inspections as requested in the Alberta Utility Commission's information clarity request, received by ATCO on September 29, 2016.

Please note that the following updates were made to Spreadsheet (b) from ATCO's last quarterly submission:

- Added information for all re-inspection and repair projects completed from June 30th, 2017 to September 27th, 2017
- Locations (rows) have been re-organized to align with ongoing inspection projects. This allows for a simplified correlation of information and will reduce the risk of reporting errors.
- Estimated number of welds was updated based upon information collected during ongoing detailed review and physical re-inspection.

The information contained here within is current as of September 27th, 2017. ATCO will provide the next quarterly update to the AUC in January 2018 and will be current as of Dec 30th, 2017.

Should the AUC request further clarification or desire further information on this matter, please contact the undersigned at 780-420-7225 or by email at graeme.feltham@atco.com.

Sincerely,

A handwritten signature in red ink, appearing to read "GF", with a horizontal line extending to the right.

Graeme Feltham, P. Eng, MBA
Vice President, Engineering & Construction
ATCO Pipelines
